

Ethics Policy

The publication of an article in a peer-reviewed journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of work of the author and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behavior. Ethics to consider when publishing:

1. Authorship of the Paper:

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study.

2. Originality and Plagiarism:

The authors should ensure that they have written entirely original works, and if the authors have used the work and / or words of others, which this has been appropriately cited or quoted.

3. Data Access and Retention:

Authors may be asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data.

4. Multiple, Redundant or Concurrent Publication:

An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Chakdaha College does not view the following uses of a work as prior publication:

- Publication in the form of an abstract;
- Publication as an academic thesis;
- Publication as an electronic preprint.

5. Acknowledgement of Sources:

Cite or refer proper acknowledgment of sources.

6. Disclosure and Conflicts of Interest:

All submissions must include disclosure of all relationships that could be viewed as presenting a potential conflict of interest.

7. Fundamental Errors in Published Works:

When an author discovers a significant error or inaccuracy in his / her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.

8. Reporting Standards:

Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance.

9. Hazards and Human or Animal Subjects:

Statements of compliance are required if the work involves chemicals, procedures or equipment that has any unusual hazards inherent in their use, or if it involves the use of animal or human subjects.

10. Use of Patient Images or Case Details:

Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper.

11. Policies for Authors

Below you will find the policies you may find useful as an author.

- Copyright: rights related to the publication and distribution of research.
- Article Sharing: details on self-archiving and posting.
- Article Withdrawal: article removal or retractions.
- Patient Consent: use of personal information of patients or other individuals.
- Research data: policy and principles on research data.
- Text and data mining: policy on data and text mining.
